Summary

Software Engineer with almost 5 years of experience in full-stack development, including significant hands-on work with Typescript/Angular and PHP/Laravel.

Significant accomplishments include developing integrations using PHP/Laravel with governmental agencies to retrieve and generate necessary documents for companies, significantly streamlining the analysis and data generation processes for clients. Additionally, developed and maintained multiple generic components using Typescript/Angular and TailwindCSS, reducing development time for new features and eliminating code duplication.

Always eager to embrace new challenges, I am focused on delivering high-quality solutions that provide real value to users. My goal is to make a positive impact wherever I go.

Experience

Software Engineer

Eloverde

May 2023 - Present

- Developed a web crawler using PHP/Laravel to integrate with an environmental agency from the state of São Paulo responsible for Waste Transport Control. This integration streamlined and accelerated the process of generating and importing required documents for the government, offering enhanced convenience for the client.
- Developed and maintained multiple generic components using Typescript/Angular and TailwindCSS, significantly reducing development time for new features and eliminating code duplication.
- Conducted code reviews to ensure quality, standardization, and best development practices, identifying potential performance, security, and maintainability issues.
- Performed detailed requirement analysis, defined implementation strategies, and estimated timelines based on task complexity to ensure more accurate deliveries.
- Mentored and supported less experienced developers by answering questions, suggesting code improvements, and promoting best practices to strengthen the team's overall quality.

Junior Software Engineer

Eloverde

May 2022 - May 2023 (1 year)

- Planned and developed solutions for the Eloverde platform using TypeScript/Angular, PHP/Laravel, and TailwindCSS.
- Performed detailed requirement analysis, defined implementation strategies, and estimated timelines based on task complexity to ensure more accurate deliveries.

Junior Software Engineer

Miner Tecnologia

May 2020 - May 2022 (2 years 1 month)

- Created a dedicated page for prospects using PHP/Laravel, JavaScript/jQuery, and Bootstrap, allowing companies to self-register for a trial. This streamlined the process, saving significant time for sales managers and the support team.
- Developed and maintained integrations with government agencies using PHP/Laravel, automating the retrieval and extraction of tax documents in XML format. These documents were then displayed on the platform in a simplified manner, making it easier for clients to analyze.
- Mentored and supported less experienced developers by answering questions, suggesting code improvements, and promoting best practices to strengthen the team's overall quality.

Software Tester

Miner Tecnologia

Sep 2019 - May 2020 (9 months)

- Responsible for conducting manual testing.

Education

Esucrí

Bachelor's degree, System Information

2018 - 2022

Licenses & Certifications

EF SET English Certificate 59/100 (B2 Upper Intermediate)

EF Standard English

2024

English (A2 Elementary)

Yázigi

2019

Skills
